Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 42-83 submitted by the preliminary amendment of July 9, 2001 have been renumbered to claims 2-43, respectively. The dependency of the renumbered claims have also been changed. This renumbering is necessary because the instant application (prior to any preliminary amendment) only contained one (1) claim, thus any new added claims needs to begin with claim 2. The following action and corresponding office action summary form refer to the renumbered claims.

Comments
Claims 31-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lange.

Lange teaches in the entire document, specifically in the abstract, column 2, lines 4-13 and the claims, a beta alumina ceramic material comprising beta alumina (sodium aluminate), ceria and zirconium oxide.

It is the examiners position that the broad interpretation of the ceramic material defined by this reference includes a mixture (composite) of sodium beta alumina, ceria and zirconia and can have the claimed continuous phases in the absence of any evidence showing the contrary. In view of this, the reference composition reads on the instantly claimed composition. In addition, it is suggested in claim 11 of the reference, that the zirconia can be doped with ceria. In view of this, no significant difference is seen to exist between the reference and the claimed invention in the absence of any evidence showing the contrary.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 1755

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2-43 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,117,807. Although the conflicting claims are not identical, they are not patentably distinct from each other because the reduction to practice of the previous patented claims would render obvious the instant claims. In the composition claims, the instant claims use "comprising" which opens the claims to the gallate material defined in the patent claims.

Applicant's arguments with respect to the composition claims (instant claims 31-41) have been considered but are moot in view of the new ground(s) of rejection.

The examiner acknowledges the declaration by Dinesh Shetty and the applicants remarks. In view of this, the rejections based on (1) Chiku et al. (589) and (2) Ichikawa et al. (as defined in the parent office action) have been withdrawn.

It appears that the instant application was filed with references (references where in the file when it was received by the examiner), however these references where not accompanied by a 1449. If in fact it was intended for these references to be considered, applicants are requested to submit (or resubmitted) a 1449 for proper consideration.

In view of the teachings as set forth above, it is the examiners position that the references reasonably teach or suggest the limitations of the rejected claims.

"A reference is good not only for what it teaches but also for what one of ordinary skill might reasonably infer from the teachings. *In re Opprecht* 12 USPQ 2d 1235, 1236 (CAFC 1989); *In re Bode* USPQ 12; *In re Lamberti* 192 USPQ 278; *In re Bozek* 163 USPQ 545, 549 (CCPA 1969); *In re Van Mater* 144 USPQ 421; *In re Jacoby* 135 USPQ 317; *In re LeGrice* 133 USPQ 365; *In re Preda* 159 USPQ 342 (CCPA 1968)". In addition, "A reference can be used for all it realistically teaches and is not limited to the disclosure in its preferred embodiments" See *In re Van Marter*, 144 USPQ 421.

Evidence of unexpected results must be clear and convincing. *In re Lohr* 137 USPQ 548.
Evidence of unexpected results must be commensurate in scope with the subject matter claimed.
